Solution Delivery Approach

Nibana Solutions approach to deliver the solutions On Premise is as follows:

- Evaluation & Planning
- Requirements Gathering
- Analysis & Design
- Development
- Testing
- Deployment
- Maintenance Support

At each of the above stages we get sign offs from IT and Business teams. We work towards getting the solutions deployed on First Time Right Basis.

Cloud Based Solutions for SMB organizations

Shortly we are in the process of developing and launching multiple enterprise wide business process solutions and applications to be hosted on Cloud specifically for the SMB segment based on pay for use. These solutions deliver excellent value for organizations with minimal/no upfront investments both in software and hardware.
